

Ayala Pharmaceuticals Reports Financial Results For the Fiscal Year Ended October 31, 2022

February 10, 2023

REHOVOT, Israel and MONMOUTH JUNCTION, N.J., Feb. 10, 2023 (GLOBE NEWSWIRE) -- Ayala Pharmaceuticals, Inc. (f/k/a Advaxis Inc.) (the "Company," "New Ayala," "we," "us" or "our") (OTCQX: ADXS), a clinical-stage oncology company, today announces financial results for the fiscal year ended October 31, 2022.

Management Commentary

"We were pleased to close our previously announced merger in January 2023," said Kenneth A. Berlin, President and Chief Executive Officer of the Company. "Our immediate priorities include executing on Part B of the ongoing registration-enabling RINGSIDE study evaluating AL102 in desmoid tumors. We believe that AL102 has best in class potential and, if approved, may have important clinical advantages including safety, convenient once daily dosing and lower pill burden. For AL101, we expect to gain clarity this year on the development path in recurrent/metastatic adenoid cystic carcinoma (R/M ACC). We also continue to make progress on the development of ADXS-504 for the treatment of early prostate cancer. The dose escalation part of the investigator-sponsored trial at Columbia University has been completed and we are now enrolling patients in an expansion cohort."

Fiscal Year 2022 and Recent Business Highlights:

- In October 2022, the Company, which was then known as Advaxis, Inc., entered into a definitive agreement to
 merge with the entity now known as Old Ayala, Inc. (which prior to the merger was named Ayala Pharmaceuticals,
 Inc.) The merged company is focused primarily on the development and commercialization AL102 for the treatment of
 desmoid tumors. The merger closed on January 19, 2023, at which time the Company changed its name to Ayala
 Pharmaceuticals, Inc.
- Announced positive interim data from Part A of the Phase 2/3 RINGSIDE study of AL102 in desmoid tumors: Data showed that AL102 had efficacy across all cohorts, with early responses that deepened over time. AL102 was well tolerated at all three dosing regimens with no dose-limiting toxicities and no Grade 4/5 adverse events. The data were featured in an oral presentation at ESMO 2022 and in a poster at the CTOS 2022 annual meeting.
- Initiated Part B (Phase 3 segment) of the RINGSIDE study in desmoid tumors: Part B of RINGSIDE is a double-blind placebo-controlled study enrolling up to 156 patients with progressive desmoid disease, randomized between AL102 or placebo. The primary endpoint is progression free survival with secondary endpoints including objective response rates, duration of response, and patient-reported quality of life measures.
- Fast Track designation granted for AL102: The U.S. FDA granted Fast Track designation for AL102 for the treatment of progressing desmoid tumors. The designation holds important advantages that may expedite the development and regulatory review of AL102.
- Presented data on AL101 in adenoid cystic carcinoma (ACC) at 2022 ASCO annual meeting: In a poster at ASCO, an update was provided on the ACCURACY study, the only prospective study conducted to date in ACC patients carrying Notch-activating mutations. An overall disease control rate of 66.7% was observed. The median PFS in each of the 4mg and 6mg dose AL101 cohorts was 3.7 months and 6.7 months, respectively, among the patients who had a partial response.
- Continued progress with Phase 1 clinical trial of ADXS-504 for early prostate cancer: Dose escalation has been completed and enrollment at second dose level is being expanded at Columbia University. Four out of six patients treated are still on study and PSA values are being followed up. ADXS-504 has been well tolerated with no serious adverse events reported.
